Natc  in
cryptocurrency

to the market through ICO. For the purposes of ICO a Australia based legal entity Natcoin will acquire part of Natcoin LLC portfolio and will be selling tokens.

Natcoin have built a token buy-back mechanism that creates transparent profit distribution model at portfolio liquidity events and at the same time creates an opportunity for investors to potentially increase the value of their tokens through token market price volatility. We are excited to introduce the opportunity for eligible parties to participate in the potential growth of the Natcoin portfolio companies.

Definitions/Apendix

The **Blockchain** is a distributed database, which utilizes the digital ledger technology that stores transaction records, and shares them among a distributed network of computers. By means of cryptography each participant of the network can access and manage the ledger in a secure way. No central authority in this system is needed. The blockchain maintains a continuously-growing list of records (blocks), each containing a timestamp and a link to the previous one.

A **Cryptocurrency** is a medium of exchange, which makes use of cryptography to secure transactions and to control the creation of the additional currency units. The development of cryptocurrency has been actively growing in the past decade, thus offering a broad range of transactional possibilities to both users and organizations.

A **Decentralized Application (DAPP)** is a type of software represented by a set of smart contracts and the code that enables them. A DAPP is designed to exist in the Internet so that no single entity can control it. DAPPs are similar to traditional web applications, although they don't have a centralized server. The function of a server is accomplished by the blockchain. DAPPs can be built on top of the blockchain, just like various altcoins. They can also connect to the other web apps and the decentralized technologies.

The **Distributed Ledger Technology (DLT)** represents a consensus of replicated, shared and synchronized digital data, geographically spread across multiple sites, countries and/or institutions. The efficiency of a distributed ledger is derived from the immediate displaying of changes made by any participant in all copies of the ledger. The full potential of distributed ledgers is attained at the moment when other applications are layered on top of them (e.g. smart contracts).

Nginx, stylized as (NGINX, NGiNX or nginx), is a web server, which can also be used as a reverse proxy, load balancer and HTTP cache. A remote procedure call (RPC) is when a computer program causes a procedure (subroutine) to execute in another address space (commonly on another computer on a shared network).

About Natcoin

Natcoin is a blockchain based digital currency (cryptocurrency) and stands on ethereum technology. Natcoin peer2peer and decentralized where the maximum coin supply is only 35,000,000.

Natcoin is a digital currency as well as a business platform and investment instrument where natcoin creates an economic ecosystem where the correlation and connectivity of natcoin circulation is enhanced not only through the community alone but to all users of digital currency

Platform

ATM Machine

Merchant

Natcoin target in the first year (first phase) is all natcoin ATM machines spread across 6 countries and has 1500 merchants with total atm machines of 200 units

Mission

The main goal of Natcoin is bringing cryptocurrencies to the masses. What NATCOIN aims to cater to its users is a complete and seamless experience of accessing the available cryptocurrency services and

products in the same place. From the very first moment a customer decides to use cryptocurrency he/she is guided through the platform and its features. Protected from any unwanted negative experience, the user will continuously find the new possibilities to use the platform and to interact on it.

By means of this integrative approach to virtual currency services, the NATCOIN platform aims to become the most preferred medium, familiarizing the NATCOIN customers with the cryptocurrencies and the ways of using them. For this purpose, the NATCOIN platform is equipped with its own token, a wallet, an exchange, a merchant platform, payment gateway / POW and a list of features that are closely related to the use of crypto.

A Decentralized Autonomous Organization

Vision

The Natcoin team is visionary in the way it approaches the development of the Crypto-One-Stop-Solution. On the track to the massive cryptocurrency adoption we do not allow the limiting belief systems to interfere with the development of the Natcoin platform. We accept the changes that the rapidly-evolving technologies bring, and welcome innovation on any and every level.

We plan our success with determination and implement it into our strategy that implies the following steps:

- providing for all the cryptocurrency users' needs via one-stop-solution services;
- rewarding users for bringing new merchants and affiliates on board;
- establishing a marketplace, where cryptocurrency users and merchants can meet each other seamlessly;
- issuing tokens with real value;
- expanding the network of customers by providing the high-quality services;
- enhancing the security of the system;
- adopting the disruptive innovations.

Roadmap

ECO-LIFE OF NATCOIN

Cryptocurrencies have all the prerequisites to becoming a viable replacement for FIAT money over the Internet, allowing millions of customers, including merchants, startups, businesses, charities, etc. as well as the unbanked individuals to gain access to the most technologically-advanced payment methods. For this reason, at NATCOIN we have designed the concept of Eco-Life, a borderless digital economic system suitable for cryptocurrency users. The Eco-Life is aimed at eliminating the challenges faced by the online payment industry via:

- Catering goods and services within the e-Commerce and the Merchant Platforms.
- Increasing the community of merchants accepting crypto as the most preferable payment method via the NATCOIN POS & POW
- Developing a lively marketplace with cryptocurrency-related services and products;
- Integrating the public cryptocurrency exchange into NATCOIN (NTC)
- Providing a competitive payment solution for industries such as gaming, real estate, etc. with direct funds deposition enabled on NATCOIN (NTC)
- Cashing-out cryptocurrencies via NATCOIN (NTC) prepaid cards and atm machines

The list of potential industries, which can benefit from using NATCOIN (NTC) is literally infinite and cannot be defined completely. Just like the internet, which is impossible to shut down, the NTC platform is likely to become a 'living' project, or 'a smart contract with no expiration date' that can endure many technological and social changes.

UPCOMING FEATURES

Natsmart Contracts as a Service (NSCaaS) Natsmart Contracts as a Service (NSCaaS) is a segment of NTC, which allows businesses to create and execute smart contracts within their system in order to simplify and automate their actions. NSCaaS has potential to become as popular as NSaaS (Software as a Service) in terms of its adoption within businesses, and has been predicted to advance the functionality within a wide range of industries. For this reason, we aim to advance the NTC software gradually to be in tune with this technological trend.

NTC(NATCOIN) has a very wide range of possibilities for development within the cryptocurrency industry. One of the main objectives of NTC is to create an environment, in which the community of cryptocurrency users will continually expand. Therefore, NTC invites startups onboard to create a vibrant market with a financial model that everyone can benefit from. The first step to building the market is realized through offering Smart Contracts as a Service allowing to implement the following features:

- Crowdfunding
- Peer-to-peer funding
- Healthcare
- Marketplace
- Escrow
- Insurance
- Voting
- Educations and scholarship funding
- Crypto exchange
- Cryptoleasing
- Etc

The full list of potential applications of NSCaaS cannot be complete at this point of the technology's development, because it is very new. The same is true about the entire NATCOIN system, that is subject to continuous change aiming for the leading position in the market. Smart contracts within NATCOIN are offered as standardized templates to be signed on the blockchain for a small fee, enabling agreements between people, regardless of location. At NATCOIN, we keep our mind open for collaboration with enterprises, businesses and startups that share the same vision and would like to cooperate in making the platform more global.

Natcoin Business Plan & Benefit

You will benefit by owning and using natcoin because the features provided by natcoin greatly benefit both you as a natcoin user who is active in transactions or for those of you who buy and own natcoin as your personal investment assets and instruments

You will benefit by owning and using natcoin because the features provided by natcoin greatly benefit both you as a natcoin user who is active in transactions or for those of you who buy and own natcoin as your personal investment assets and instruments

The features provided are very interesting namely Autobot 0.80% where your equity or asset coins accumulate and 0.80% lop. Not only there you will get Lend profit from 4% -9% per week (from the value of the asset coins in lending).

ICO & CROWDSALE

Ico crowdsale will start on.....where at the time of ICO natcoin will be released as much as 5,000,000 NTC

Token Swap (ICO) Detail	
Symbol	NTC
Total Supply	35.000.000 Token (Thirty Five Million NTC Token)
Exchange rates	\$ 0.80 per 1 NTC
NTC Token Allocation Plan	<p>Maximum Supply – 35.000.000 NTC Tokens (35 mil)</p> <ul style="list-style-type: none"> • 5.000.000 NTC Tokens – NTC Token Swap (ICO) (minimum amount is 0.001 ETH) <ul style="list-style-type: none"> ◦ The Token Swap (ICO) will start on 10 th of August – 08:08 PM SG Time ◦ The Token Swap (ICO) will end on 10th of September – 08:08 PM SG Time • 5.000.000 NTC Tokens – Developers, Staff, Strategic Partners**, Operations • 8.000.000 NTC –Resource & development (phase 2) • 11.000.000 NTC –Payment Token (for ecosystem) • 500.000 NTC – Affiliate program during ICO • 10.500.000 NTC- Shareholder <p>**NTC Tokens allocated to the Advisory Board</p>

	<p>will be locked for 90 days.</p> <p>*** NTC tokens allocated to Developers, Staff, Strategic Partners, Shareholders and Board of Directors will be locked for 180 days.</p>
NTC Token Swap ICO (Fund distributions Plan)	<ul style="list-style-type: none"> • 50% - IT Development, User Experience, Roadmap Completion • 10% - Mergers and Acquisitions • 25% - Marketing Plan • 10% - Operations • 5% - Shareholders, Board of Directors, Advisory Board
Escrow System	<p>All ETH from the Main Token Swap (ICO) that begins on August 10 th , 2017 will go into a Multi-Sig Wallet with 3 Signatories.</p> <p>The Release Procedure from the Escrowed ETH Wallet will take place annually based on the approved budgeting presented by the Natcoin Management:</p> <ul style="list-style-type: none"> • 34% - 2018 Budget • 33% - 2019 Budget • 33% - 2020 Budget
Algorithm	Ethereum Casper POW & POS (Hybrid)

Our Product (On Development and research)/ PHASE 2 & 3

a. NatAssurance

Natassurance is an insurance company based on blockchain technology by integrating cryptocurrency as a transaction tool. Natassurance is the world's first cryptocurrency-based insurance company.

Excellent products from natassurance are:

Natlife (Life Insurance)

NatGen (General Insurance)

Natasset (Insurance letter and valuable ownership asset)

Natedu (Insurance education)

Natassurance is a network marketing-based insurance such as prudential where natcoin is a token and a tool of transactions and means of payment from all natassurance customers.

b. Natfinance

NATFinance
Financing & Lease based cryptocurrency

Natfinance is a business unit (corporate form) where natfinance becomes a financing company that provides solutions to all its customers. Natfinance has product financing products such as:

1. motor vehicle financing
2. electronic financing
3. business financing
4. education financing

Natfinance is an unrestricted company between region and country where online financing is based on financing using cryptocurrency.
